

## Corporate bio

**Approach Cyber is your pure-play cyber security and privacy trusted partner. We take care of your cyber security so you can focus on your business with complete peace-of-mind.**

We address today's rising cyber security challenges by helping you prevent, withstand, and recover from cyber-attacks, incidents and breaches – safeguarding your operations, ensuring compliance, and protecting your reputation.

Approach Cyber offers a comprehensive portfolio of solutions spanning the entire cyber security value chain. We implement and support effective solutions seamlessly within your organisation through specialised services, including advisory, staffing, awareness programs, education, technology integration, and software development. Our 24/7 managed security services, delivered from our in-house Security Operations Centre (SOC), provide continuous monitoring and rapid on-site intervention, keeping your organisation secure around the clock.

As a proven and dynamic scale-up with a multidisciplinary team of over 100 experts across four locations in Belgium and Switzerland, we bring 25 years of experience and have delivered thousands of successful projects across industries. Trusted by prestigious clients worldwide, we stand for top-notch expertise, a human-centric approach, and no-nonsense execution, consistently delivering tailored solutions that exceed expectations.

Our company is ISO 27001 certified and ISO 27701 verified, ensuring the highest standards of security and privacy for our clients.
